# Cyxtera Digital Exchange

Enterprise control, cloud agility

Transform the way you build, operate, and scale your IT infrastructure with on-demand provisioning that reduces deployment time, increases flexibility, and accelerates your time to market.

Accelerate your time-to-solution

Deploy your IT infrastructure in minutes, not months, with click-to-provision access.

Predict and control costs

Avoid rigid contracts and costly capital investments with our predictable, monthly pricing model.

Maintain control

Unlock cloud-like agility and scale without compromising on network security, reliability, or performance.

Simplify operations

Connect and control infrastructure, networks, and services without manual setup or custom cabling.

Enhance flexibility and agility

Right-size your environment without the risk of overprovisioning space, power, or bandwidth.

Your data center on-demand

Rapidly provision high-performance compute, storage, and networking services that seamlessly extend your data center environment.

SmartCabs
Point-and-click provisioning of dedicated cabinets complete with power and connectivity.

Enterprise Bare Metal
Instantly provision high-performance servers from top-tier providers like HPE, Dell, Nutanix, and Fujitsu.

Cyxtera Command Center
Monitor, manage, and control your infrastructure from a single dedicated platform.

AI/ML Compute-as-a-Service
Solve for specialized workloads atscale with access to NVIDIA® DGX™ A-100 systems in a flexible monthly model.

Enterprise Storage
Deliver data access and ownership with scalable, flexible storage in afully managed cloud model.

Interconnection
Private, high-performance connections at software speed.

IP Connect
Unlock programmable private connections and resilient bandwidth without cabling or routing equipment.

Cyxtera Cloud Connect
Direct, secure connections to public cloud service providers – AWS, Azure, GCP, OCI – in near real time.

Cyxtera Marketplace
Access enterprise-grade solutions and services for compute, storage, connectivity, security, and other needs.

Cyxtera Digital Exchange

Digital Exchange-Connected Environment

Colocation

One fabric
Connect physical and digital environments, services, and partners —on campus or or across town.

Seamless integration
Everything is simply an endpoint on a unified fabric: extend and operate a completely integrated environment with ease.

High-performance connectivity
Low-latency Layer 2 connections give you secure, private, and direct connectivity without the burden of physical cabling.

Programmable control
Programmatically customize networking policy for your application architecture— bring your own IP, and set up your networks exactly as you need them.

Connect to the Digital Exchange from anywhere

Connect from colocation

- Redundant, dual hand-off fiber connection via 1, 10, or 100 Gbps Exchange Port

- Seamless extension of colocation environment to all Digital Exchange services

- 99.999% availability SLA

- 24x7x365 monitoring, management, and support

Connect remotely

- Blended bandwidth connection via Networking-as-a-Service, with connectivity scalable from 10 Mbps to 5 Gbps (burstable 10Gbps)

- Secure access from anywhere via IPSEC VPN tunnel and SNAT/DNAT

- 99.999% availability SLA

- 24x7x365 monitoring, management, and support
